Consent to create a public dataset from audio and video recordings

I, _____ (name of the responsible person), hereby consent to the use and disclosure of audio and video recordings without identifying characteristics of _____(name of the patient), by the developer _____ (developer's name).

1. I agree that the materials provided in non-personally identifiable form may be disclosed as part of publicly available data usable for research and development purposes.

2. I acknowledge that third-party cloud services, including those outside the European Union, may be used to store and process the data provided.

3. The following rules will be followed when processing the data:

    i)   Reasonable measures to anonymise the data and prevent the disclosure of sensitive personal data.

    ii) The records may contain data about third parties, but will be anonymised as part of the processing - data that would allow direct identification (typically names, direct facial images etc.) will be removed. Fragments of recordings of people from the child's environment may be included in the data.

4. I understand that I have the right to withdraw my consent at any time. However, once the data is publicly available, there is no option to remove it.
